

PRABATH P U

Kerala, India

+91 9048247225 — prabathunni826@gmail.com — linkedin.com/in/prabath77 — github.com/Prabathunni

Full-stack engineer with 1+ year of production experience on live SaaS platforms (React, Next.js, Node.js, TypeScript, Go).
Progressed from intern to SDE; own modules end-to-end, from database to UI to deployment.

Experience

Software Development Engineer - I

May 2026 – Present

Skookum Infotech LLP

Remote

- Co-built **Stone Suite**, a multi-tenant CRM platform, and own its frontend end-to-end (React, Next.js, TypeScript): authentication, routing, state management, and integration with the Go/PostgreSQL backend.
- Implemented the CRM workflow engine (Lead → Prospect → Customer) and its approval system – approver assignment, status banners, and backend authorization checks.
- Built dynamic role-based access control: role/permission management, per-user role switching, and permission-gated CRUD actions.
- Added Microsoft and Okta sign-in, set up AWS, and handle deployments through Azure Pipelines.
- Owned the Sales Order and Invoicing module (PDF/CSV export) and a token-based customer onboarding flow across backend and frontend; active in code reviews and bug fixing.

Software Developer Intern → Junior Software Developer

August 2025 – April 2026

Bytelock Digital Solutions

Remote

- Shipped production features on three live SaaS products (see Projects) using Next.js, Node.js, TypeScript, PostgreSQL, and CouchDB; converted from intern to full-time on performance.
- Implemented RBAC with designation-level module access across the platforms; integrated Authorize.net payments, built the JobConnect subscription system, and set up Haraka SMTP email.
- Built the aQuafleet360 Electron desktop app from scratch with offline login, so it works on ships with poor connectivity.
- Owned the recruiter module: job posting, talent pool, resume-based candidate matching, API-based candidate sourcing, and team configuration for recruiting companies.

MERN Stack Developer Intern

January 2025 – July 2025

Luminar Technolab

On-site

- Completed an intensive 6-month MERN training program, building full-stack apps with React.js, Node.js, Express.js, and MongoDB, including RESTful API design and JWT authentication.

Projects

aQuafleet360 | *Next.js, Node.js, TypeScript, CouchDB, Electron.js* | aquafleet360.com

Aug 2025 – Apr 2026

- Fleet management platform used on ships; built user management, RBAC, payments, and the offline desktop app.

JobConnect | *Next.js, Node.js, TypeScript, Docker, PostgreSQL* | job-connect.ca

Dec 2025 – Apr 2026

- Job search and hiring platform with smart matching; built subscriptions, payments, and candidate-matching APIs.

RecruiterHub | *Next.js, Node.js, TypeScript, PostgreSQL, Python* | recruiterhub.ai

Dec 2025 – Apr 2026

- AI-powered recruiting platform; built most of the recruiter module, resume-based matching, and API integrations.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Go, Python (Basic), HTML5, CSS3

Frontend / Backend: React.js, Next.js, Tailwind CSS, Node.js, Express.js, RESTful APIs, JWT, Microsoft/Okta Sign-in, RBAC

Databases: PostgreSQL, CouchDB, MongoDB

DevOps & Tools: Docker, AWS, Azure Pipelines, GitHub Actions, Electron.js, Git, GitHub, Postman, Linux, Claude Code

Education

Universal Engineering College

July 2020 – June 2024

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Kerala, India
